

CCTV Policy

Black Dragon Games Ltd uses closed circuit television (CCTV) images to protect the Company's property and to provide a safe and secure environment for employees and visitors to the Company's business premises. This policy sets out the details of how the Company will collect, use and store CCTV images.

The Company's CCTV facility will only record images. There is no audio recording i.e. conversations are not recorded on CCTV.

The data collected from the system will assist in:

- Prevention or detection of crime or equivalent malpractice.
- Identification and prosecution of offenders.
- Monitoring of the security of the Company's business premises.

Cameras are located at strategic points throughout the Company's business premises. The Company has positioned the cameras so that they only cover communal or public areas on the Company's business premises and they have been sited so that they provide clear images. No camera focuses, or will focus, on toilets.

All cameras are also clearly visible.

Appropriate signs are prominently displayed so that employees, customers and other visitors are aware they are entering an area covered by CCTV.

Images produced by the CCTV equipment are intended to be as clear as possible so that they are effective for the purposes set out above.

Images may be recorded either in constant real-time (24 hours a day throughout the year), or only at certain times, as the needs of the business dictate.

As the recording system records digital images, any CCTV images that are held on the hard drive of a PC or server are deleted and overwritten on a recycling basis and, in any event, once the hard drive has reached the end of its use, it will be erased prior to disposal.

Images that are stored on, or transferred on to, removable media such as CDs or which are stored digitally are erased or destroyed once the purpose of the recording is no longer relevant. In normal circumstances, this will be a period of 12 months. However, where a law enforcement agency is investigating a crime, images may need to be retained for a longer period.

Access to, and disclosure of, images recorded on CCTV is restricted. This ensures that the rights of individuals are retained. Images can only be disclosed in accordance with the purposes for which they were originally collected.

The images that are filmed are recorded centrally and held in a secure location. Access to recorded images is restricted to the operators of the CCTV system and to those line managers who are authorised to view them in accordance with the purposes of the system. Viewing of recorded images will take place in a restricted area to which other employees will not have access when viewing is occurring.

Disclosure of images to other third parties will only be made in accordance with the purposes for which the system is used and will be limited to:

- The police and other law enforcement agencies, where the images recorded could assist in the prevention or detection of a crime or the identification and prosecution of an offender or the identification of a victim or witness.
- Prosecution agencies, such as the Crown Prosecution Service.
- Relevant legal representatives.

The Managing Director of the Company (or another senior director acting in their absence) is the only person who is permitted to authorise disclosure of images to external third parties such as law enforcement agencies.

All requests for disclosure and access to images will be documented, including the date of the disclosure, to whom the images have been provided and the reasons why they are required. If disclosure is denied, the reason will be recorded.

Individuals' access rights

Under the UK's data protection laws, including the General Data Protection Regulation (GDPR), individuals have the right on request to receive a copy of the personal data that the Company holds about them, including CCTV images if they are recognisable from the image.

Your request must include the date and approximate time when the images were recorded and the location of the particular CCTV camera, so that the images can be easily located and your identity can be established as the person in the images.

The Company will usually respond promptly and in any case within one month of receiving a request. However, where a request is complex or numerous the Company may extend the one month to respond by a further two months.

The Data Protection Officer will always determine whether disclosure of your images will reveal third party information, as you have no right to access CCTV images relating to other people. In this case, the images of third parties may need to be obscured if it would otherwise involve an unfair intrusion into their privacy.

If the Company is unable to comply with your request because access could prejudice the prevention or detection of crime or the apprehension or prosecution of offenders, you will be advised accordingly.
